Product Details

Liferay DXP Cloud takes everything companies love about DXP and adds an expert foundation for deploying, managing and scaling your projects in the cloud.

DEVELOPMENT LIFECYCLE AND PERFORMANCE

- Face the unexpected with auto scaling capabilities to maintain performance during peak traffic times.
- Leverage a full CI/CD strategy, powered by Jenkins, to enable zero downtime deployments. Integrations with GitHub, Gitlab, and Bitbucket are supported out-of-the-box.
- Declare dependencies of your services to ensure they deploy in the best sequence for each application.
- Enable access to a persistent file system and keep your files in the same state even after re-deploying or restarting services.

ADVANCED MONITORING

- Consolidate usage and health metrics in one interface, with alerts and resolution management to maintain project performance.

- View tailored dashboards with information on JVM, garbage collection, response times and much more with out-of-the-box integration for [Dynatrace Software Intelligence](#).

GOVERNANCE AND SECURITY

- Benefit from Liferay DXP's adherence to OWASP Top 10 and support of main security requirements in the market, including government-grade encryption, pluggable authentication and LDAP authentication.
- Invite team members and enable secure collaboration by controlling the level of access and permissions to each of your project environments.
- Add an extra level of security with a database that has encryption at rest and encryption in transit.
