

ISDEFE

Implementation of a portfolio and project management system

The project

Client

ISDEFE, Systems Engineering company for the Defense of Spain, required the implementation of Microsoft Project Online and Power BI for portfolio management and project life cycle. They also needed a program to optimize budget management which in turn was in line with the Ministry's capabilities.

Used services

- Project & Portfolio Management Solutions (PPM)

Technology

Microsoft Power BI and Project Online

Challenges

To manage project portfolio

To manage documentation, risks, incidents, deliveries and project demands.

Project Status Reporting and Portfolio

The solution

They projected the design, development and implementation of a pilot for project management supported by Microsoft suite of tools: Project Online and Power BI. After the ISDEFE pilot was presented to the Ministry of Defense, it proved to be of great interest and they decided to implement a system for their management of the Project Portfolio.

The result

The implemented solution allowed the Ministry to correctly manage the project portfolio and its life cycle. In addition, the project portfolio has been improved with the strategy of the Ministry of Defense and with the budgetary management.
